Use-Case Specification: Manage plants

1. Use-Case Name

1.1 Brief Description

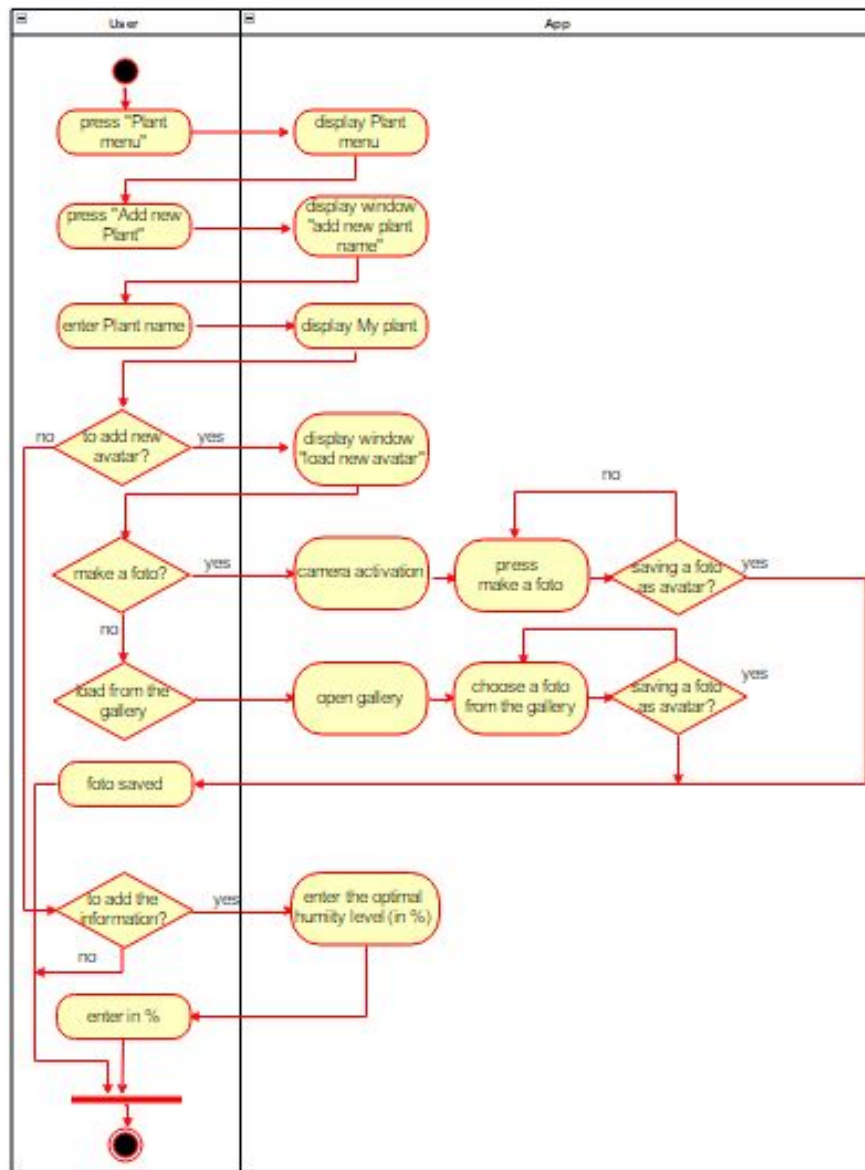

User has the ability to add a new plant in the list. Also, change the image and add information about the plant (the optimum humidity level).

1.2 Mockup

2. Flow of Events

2.1 Basic Flow

2.2 Alternative Flows

(n/a)

3. Espresso test

```
package com.project.gta.demo;

        @Override
        public void describeTo(Description description) {
            description.appendText("Child at position " + position + " in parent ");
            parentMatcher.describeTo(description);
        }

        @Override
        public boolean matchesSafely(View view) {
            ViewParent parent = view.getParent();
            return parent instanceof ViewGroup && parentMatcher.matches(parent)
                && view.equals(((ViewGroup) parent).getChildAt(position));
        }
    };
}
}
```

4. Special requirements

(n/a)

5. Preconditions

5.1 Camera/Foto

User has installed the application and is in the "Plant menu". The phone has a camera or at least one photo in the gallery.

6. Postconditions

6.1 Avatar/Information

The plant will be a avatar.

6.2 Humidity data

The information about the level of humidity data will help to ensure that the user would received a message about the need for watering in time.

7. Extension Points

(n/a)
